

## **C R706 - DESCRIPTION OF SERVICES**

### **SCOPE OF WORK**

*NSM will provide all resources including personnel, management, supplies, services, materials, equipment, facilities and transportation necessary to provide a wide range of services as specified in each task order.*

### **C R706 LOGISTICS SUPPORT SERVICES**

*NSM offers services under SIN C R706 which is described as follows:*

**Logistics Support Services** - Includes supply and value chain management (e.g., planning, development, management, operation, and maintenance of logistics systems dealing with the acquisition support, movement, and maintenance of resources); acquisition logistics (e.g., Services may include acquisition logistics or integrated logistics support associated with the design, development, test, production, fielding, sustainment, and improvement of cost effective systems including the eventual disposal or salvage of these systems. Contractors may provide logistics expertise in the pre-production or design phase of systems to ensure that the system can be supported through its lifecycle and that the infrastructure elements necessary for operational support are identified and acquired. These services may continue through the life cycle of the system or product and include guidance, assistance and/or operational support); distribution and transportation logistics services (e.g., moving and storage (excluding household goods), transportation system development and management, carrier management and routing, and freight forwarding. Services may include planning and design, implementation, or operation of systems or facilities for the movement of supplies, equipment or people by road, air, water, rail, or pipeline); deployment logistics (e.g., contingency planning; inventory/property planning, movement, storage, and accountability; and communications and logistics systems to permit rapid deployment and management of supplies and equipment. Expert guidance or operational support to identify and utilize regional or global resources, and integrate public and private sector resources); logistics training services (e.g., training in system operations and automated tools for supply and value chain management, property and inventory management, distribution and transportation management, and maintenance of equipment and facilities supporting these activities); and support products.
